**Seismic Design and Education Series**

*The Seismic Design Handbook* remains the standard textbook of earthquake-resistant design for the 6th consecutive year

*"... succeeds in its task to an extent that will make it a highly desirable reference book to any group engaged in the seismic design of buildings both in and outside the U.S.A."*

*Earthquake Engineering & Structural Dynamics, Volume 19, 623 (1990).*

*"This comprehensive summary of the current practice of earthquake resistant design will be of interest to all EERI members.... should be welcomed by a large body of readers, who will find in it a good deal of up to date information provided in a clear and concise form."*

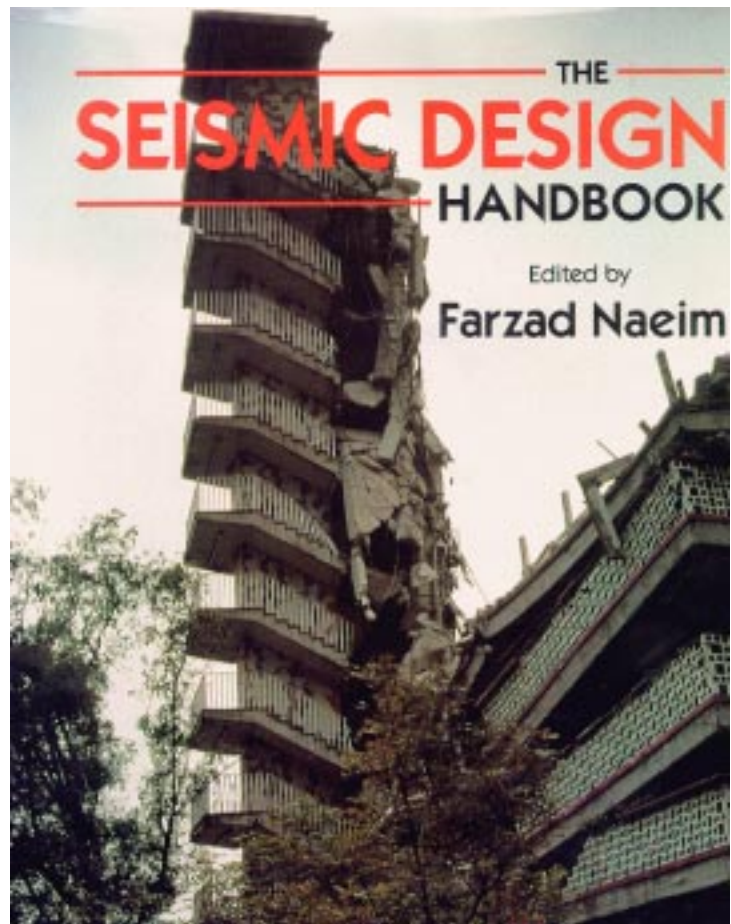

*Donald E. Hudson, California Institute of Technology, EERI Newsletter, Volume 24, Number 3 (1990)*

Edited by the Director of Research and Development at John A. Martin and Associates, Inc. and published in 1989 by Van Nostrand Reinhold and subsequently by Chapman and Hall international publishers. *The Seismic Design Handbook* has become and remained the standard text book of earthquake-resistant design.

The handbook has sold over 14,000 copies which is unprecedented for a specialty technical book in this category. It has been used as textbook in more than 15 major U.S. universities and many other universities worldwide.

It has been called a truly indispensable one-volume resource for engineers, architects, developers, contractors, and students of structural engineering and architecture. In its pages you will find the most up-to-date information on the planning, analysis, and design of earthquake-resistant building structures. While most other books on seismic design have a purely theoretical flavor, this book bridges the gap between theory and practice with a strong "how to do it" emphasis throughout.

Investment in research and development of classic textbooks such as *The Seismic Design Handbook* is yet another reason why John A. Martin and Associates, Inc. represents more than 40 years of design leadership.

**Used as a textbook at:**

- *University of California, Berkeley*
- *University of California, Los Angeles*
- *University of Southern California*
- *University of California, Davis*
- *California Polytechnic Institute*
- *Israel Technical University (Technion)*
- *University of Texas at Austin*
- *California State University, Northridge*
- *Texas A&M University*
- *Stanford University*
- *Imperial College of London*
- *Georgia Institute of Technology*
- *State University of New York at Buffalo*
- *Cornel University*
- *University of Illinois*
